## ABOUT US

TSM South is a solutions integrator focused on providing innovative communications and networking for small to large enterprises nationwide.

We offer fully converged communications solutions, from IP telephone systems to professionally hosted and managed IP communication solutions. Our consulting services include planning, engineering, programming, and installation of systems and services to meet your business needs.

We believe in serving our customers with superior solutions and world-class support. Our experience, knowledge, the quality of our services and our relationships with our business partners have been the ingredients of TSM South's success.

TSM South's business philosophy is to make the customer the center of all corporate decisions. Customer satisfaction is the corporate goal.
